

JMeter results:

The screenshot shows the JMeter View Results Tree. The left sidebar lists the test structure: JSONPlaceholder API Load Test, HTTP Request Defaults, Thread Group - Posts Endpoint, GET /posts/1, GET /posts, View Results Tree (selected), and Summary Report. The main panel displays the details for the selected 'GET /posts/1' sample. The 'Text' tab is active, showing the following information:

- Thread Name: Thread Group - Posts Endpoint 1-1
- Sample Start: 2026-08-14 11:46:40 PKT
- Load time: 1504
- Connect Time: 1371
- Latency: 1504
- Size in bytes: 1516
- Sent bytes: 137
- Headers size in bytes: 1224
- Body size in bytes: 292
- Sample Count: 1
- Error Count: 0
- Data type ("text"/"bin"/""): text
- Response code: 200
- Response message: OK
- HTTPSampleResult fields: ContentType: application/json; charset=utf-8, DataEncoding: utf-8

At the bottom, there are checkboxes for 'Scroll automatically?' and 'Raw'/'Parsed' tabs.

The screenshot shows the JMeter Summary Report. The left sidebar is the same as the previous screenshot, but 'Summary Report' is now selected. The main panel displays the summary statistics for the test. The 'Text' tab is active, showing the following information:

Name: Summary Report

Comments:

Write results to file / Read from file

Filename: results/summary_report.jtl

Log/Display Only: ☐ Errors ☐ Successes

Label	# Samples	Average	Min	Max	Std. Dev.	Error %	Throughput	Received KB/sec	Sent KB/sec	Avg. Bytes
GET /posts/1	50	253	85	1504	306.44	0.00%	5.9/sec	8.76	0.79	1515.4
GET /posts	50	240	95	2527	391.79	0.00%	6.3/sec	177.59	0.83	28750.4
TOTAL	100	246	85	2527	351.77	0.00%	10.6/sec	157.18	1.41	15132.9

At the bottom, there are checkboxes for 'Include group name in label?' and 'Save Table Data' (checked), and a 'Save Table Header' checkbox.

Postman workspace:

This screenshot shows a Postman workspace named "Saim Ovais's Workspace". The left sidebar contains a "COLLECTIONS" panel with "JSONPlaceholder API Testing - Assignment 4" expanded, showing "1. GET Requests" and "2. POST Requests". The "GET All Posts" request is selected. The main panel displays the request details for "GET All Posts" with a method of "GET" and a URL of "((baseUrl)) /posts". The "Params" tab is active, showing a table with two rows: "Key" and "Value". The "Body" tab is also visible, showing a JSON response with a status of "200 OK". The right sidebar shows the "Visualize Response" panel with a "Visualize" button and a description of the response.

Saim Ovais's Workspace

JSONPlaceholder API Testing - Assignment 4 > 1. GET Requests > GET All Posts

GET ((baseUrl)) /posts

Send

Params

Key	Value	Description	Bulk Edit
Key	Value	Description	

Body

```
1 [
2   {
3     "userId": 1,
4     "id": 1,
5     "title": "sunt aut facere repellat provident occaecati excepturi optio reprehenderit",
6     "body": "quia et suscipit\nuscipit recusandae consequuntur expedita et cum\nreprehenderit molestiae ut ut quas totam\nnostrum rerum est autem sunt rem eveniet architecto"
7   },
8   {
9     "userId": 1,
10    "id": 2,
```

Visualize Response ...

/visualize Visualize the response

incomplete body data (only title, no body or userId)

- Response returned { "title": "foo", "id": 101 } — confirming the server assigned an ID
- Both tests passed — status check and id property presence were both verified successfully

This is a negative test validating that JSONPlaceholder handles partial/missing request body fields without erroring out.

This screenshot shows the same Postman workspace, but with the "PUT Update Post (id=1)" request selected. The main panel displays the request details for "PUT Update Post (id=1)" with a method of "PUT" and a URL of "((baseUrl)) /posts/1". The "Params" tab is active, showing a table with two rows: "Key" and "Value". The "Body" tab is also visible, showing a JSON response with a status of "200 OK". The right sidebar shows the "Visualize Response" panel with a "Visualize" button and a description of the response.
